

2.1 PyTorch에서 제공하는 CNN을 이용한 패션 MNIST 데이터셋을 분류하는 모델을 구현
cmd에서 pip install torch torchvision 설치 후 실행

```
명령 프롬프트 - python train_ x + v
train acc:95.31%, test acc:92.19%
=====iteration:6700=====
train acc:95.88%, test acc:91.6%
=====iteration:6800=====
train acc:95.58%, test acc:92.09%
=====iteration:6900=====
train acc:95.68%, test acc:91.89%
=====iteration:7000=====
train acc:95.28%, test acc:91.89%
=====iteration:7100=====
train acc:95.28%, test acc:93.07%
=====iteration:7200=====
train acc:95.01%, test acc:91.99%
=====iteration:7300=====
train acc:96.24%, test acc:92.97%
=====iteration:7400=====
train acc:95.84%, test acc:92.77%
=====iteration:7500=====
train acc:96.61%, test acc:93.46%
=====iteration:7600=====
train acc:95.84%, test acc:93.16%
=====iteration:7700=====
train acc:95.84%, test acc:92.77%
=====iteration:7800=====
train acc:97.37%, test acc:93.16%
=====iteration:7900=====
train acc:96.31%, test acc:92.97%
=====iteration:8000=====
train acc:96.41%, test acc:92.48%
=====iteration:8100=====
train acc:96.97%, test acc:93.07%
=====iteration:8200=====
train acc:96.71%, test acc:91.89%
=====iteration:8300=====
train acc:96.34%, test acc:92.48%
=====iteration:8400=====
train acc:96.41%, test acc:91.5%
=====iteration:8500=====
train acc:96.68%, test acc:92.68%
=====iteration:8600=====
train acc:97.07%, test acc:92.48%
=====iteration:8700=====
train acc:97.51%, test acc:92.97%
=====iteration:8800=====
train acc:96.71%, test acc:93.36%
=====iteration:8900=====
train acc:96.44%, test acc:92.19%

===== 최종 정확도 =====
train acc:96.61%, test acc:93.46%
|
```

2.2 교제(밑바닥부터 시작하는 딥러닝)에서 나오는 CNN 소스코드를 이용하여 패션 MNIST 데이터셋을 분류하는 모델을 구현

```
명령 프롬프트 - python train_ x + v
train acc:95.83%, test acc:92.7%
=====iteration:6700=====
train acc:96.4%, test acc:93.3%
=====iteration:6800=====
train acc:96.13%, test acc:91.9%
=====iteration:6900=====
train acc:95.87%, test acc:92.4%
=====iteration:7000=====
train acc:96.3%, test acc:92.5%
=====iteration:7100=====
train acc:96.0%, test acc:92.9%
=====iteration:7200=====
train acc:95.9%, test acc:91.6%
=====iteration:7300=====
train acc:95.27%, test acc:91.4%
=====iteration:7400=====
train acc:96.33%, test acc:92.4%
=====iteration:7500=====
train acc:96.27%, test acc:91.4%
=====iteration:7600=====
train acc:96.17%, test acc:92.5%
=====iteration:7700=====
train acc:96.97%, test acc:92.1%
=====iteration:7800=====
train acc:96.87%, test acc:92.0%
=====iteration:7900=====
train acc:96.87%, test acc:93.2%
=====iteration:8000=====
train acc:96.3%, test acc:91.4%
=====iteration:8100=====
train acc:96.2%, test acc:91.8%
=====iteration:8200=====
train acc:96.8%, test acc:91.7%
=====iteration:8300=====
train acc:96.83%, test acc:92.4%
=====iteration:8400=====
train acc:97.0%, test acc:92.3%
=====iteration:8500=====
train acc:97.07%, test acc:92.2%
=====iteration:8600=====
train acc:96.97%, test acc:91.8%
=====iteration:8700=====
train acc:97.17%, test acc:91.7%
=====iteration:8800=====
train acc:97.0%, test acc:91.3%
=====iteration:8900=====
train acc:97.53%, test acc:91.8%

===== 최종 정확도 =====
train acc:97.43%, test acc:92.22%
